<p><b><u>PORTABLE OXYGEN SYSTEM</u></b></p> <p>Provides individual breathing capability.</p>	
<p><b>Portable Emergency Oxygen System</b></p> <p>The need for a continuous supply of oxygen is essential in maintaining life support during a variety of emergency conditions. In the event the brain is deprived of a supply of oxygen for a matter of a few minutes, an individual will lose consciousness and without intervention, will die. The OxyDose™ Portable Emergency Oxygen System is designed for such emergencies. It is small, light weight and easily carried by hand or worn with the convenient waist belt or shoulder bag.</p> <p>Oxygen flow is accurately and easily accomplished via the precise regulator attached to the OxyDose Cylinder. An oxygen mask is worn and when the supply of oxygen is maintained, the individual may evacuate the emergency, be maintained until rescue services are available or the situation causing the emergency has past.</p>	
<p><b><u>Typical Emergencies</u></b></p> <ul style="list-style-type: none"><li>– Medical Emergency, any situation in which the supply of oxygen is cut off or diminished: heart attack, seizures, other conditions resulting in loss of consciousness.</li><li>– Fire and potential for smoke inhalation occurring in large buildings, confined areas.</li><li>– Accidents or crisis in remote locations, hiking, climbing, automobile, etc.</li><li>– Contaminated locations, including loss of air quality or exposure to contaminated air/environment</li></ul>	
<p><b><u>Specifications</u></b></p> <ul style="list-style-type: none"><li>– Capacity: 2 sizes- 34 liter and 113 liter</li><li>– Height: 34 liter - 10 inches, 113 liter – 14 inches</li><li>– Weight (empty): 34 liter -2 lbs., 113 liter – 3 lbs</li><li>– Regulator/Flow Meter: oxygen flow 0-8 LPM (both sizes)</li><li>– Waist belt available for 34 liter OxyDose™ System</li><li>– Shoulder bag available for 113 liter system.</li></ul>	 <p>Face Mask</p>
