STUN BATONS

A **special security tool** is an electrical self-defense device that delivers an electric shock to neutralize an assailant. Safe, No serious injury is inflicted because of its low amperage.

- ➡ Powerful Baton! Favorite among Security Guards to neutralize an assailant. Simply touch an attacker with the stun baton and pull the trigger and leaves an attacker dazed and paralyzed within three to five seconds.
- ➡ Stun Baton delivers an electric shock when touched six inches from the tip to prevent an attacker from grabbing it and taking it away.
- ➡ This special security tool is an electrical self-defense device that uses high voltage to stop an assailant. Its prongs (baton point), once touched, an attacker is quickly immobilized.
- ➡ Safe! No serious or permanent injury is inflicted because of its low amperage. The electrical shock emitted from the unit does not pass from the person being stunned to the person doing the stunning. Its effect is localized only in the affected area and will not pass through the body.
